FULLY ASSEMBLED UNITS

Pre-cut Unit
Stickers to help
you design your
new Alpine Kitchen

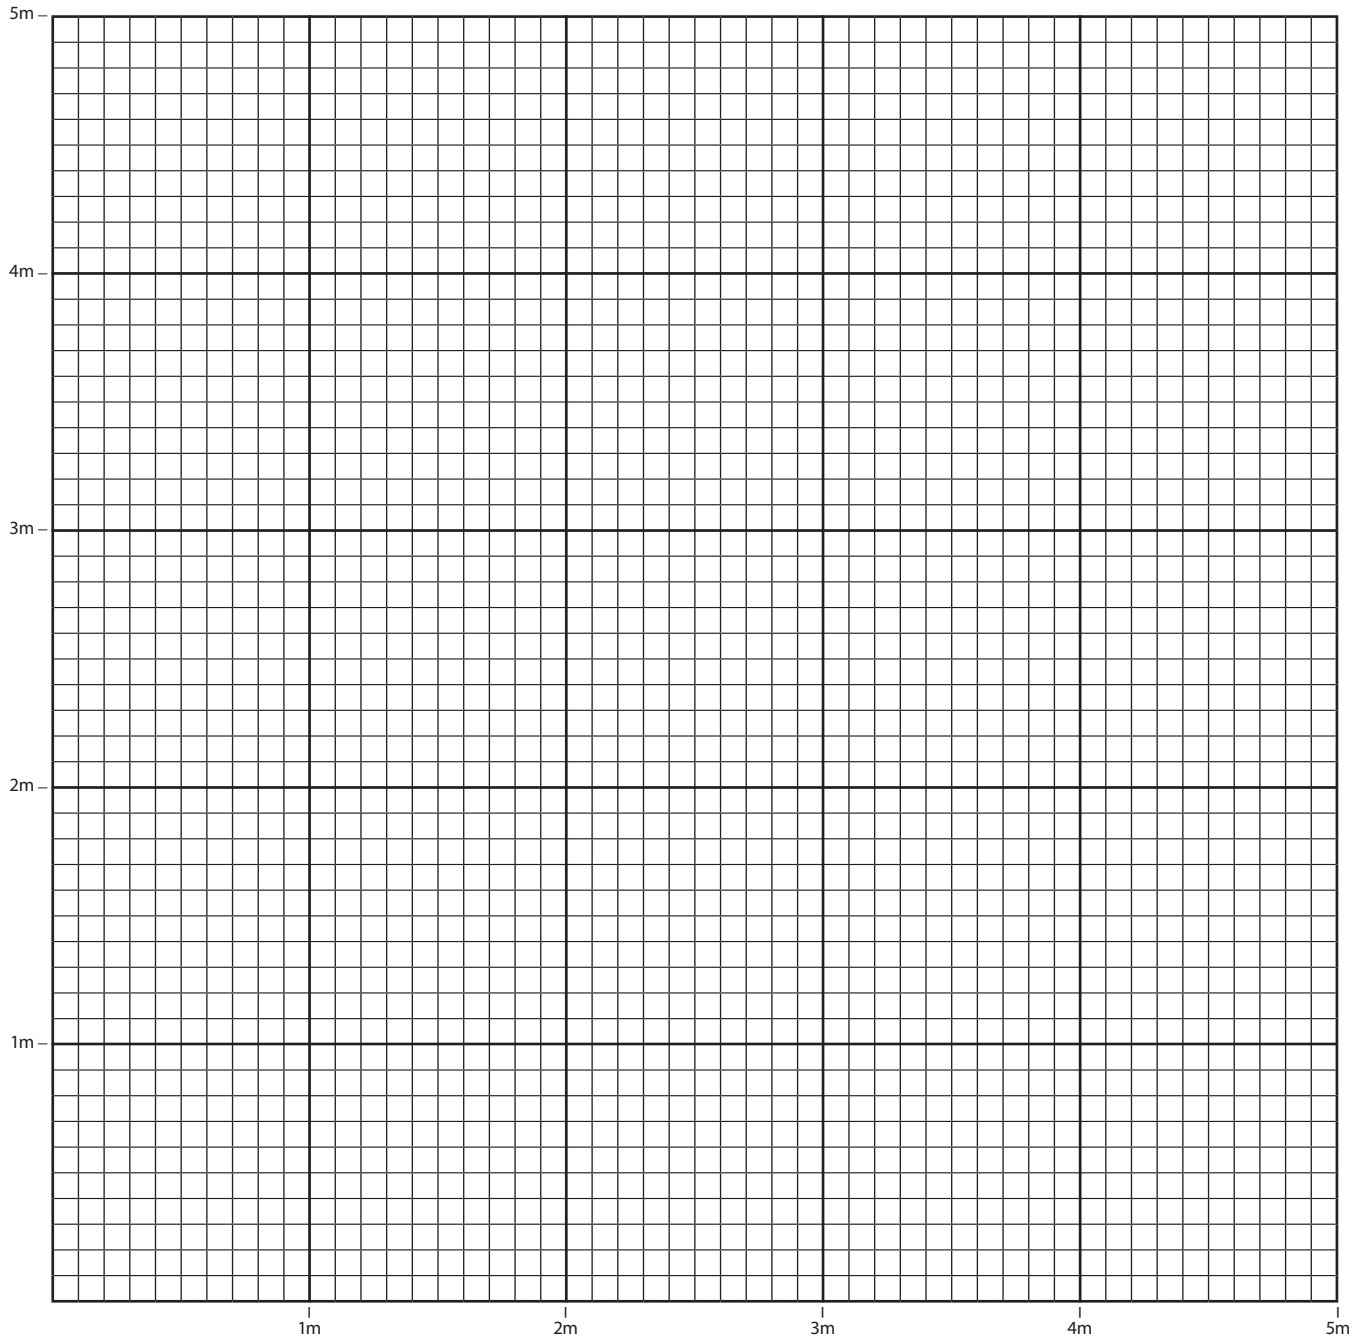

Now the fun part

You're done with the planning stage, so it's time you measured-up and started designing.

First off, you'll need to measure and map out all the things that take up space in the room – like doors and windows. Make a note of which way they open. Then you'll need to locate and mark your plumbing and electrical outlets.

Now transfer all your measurements to the design grid below and start designing your dream kitchen!

SCALE: 1 square = 100mm

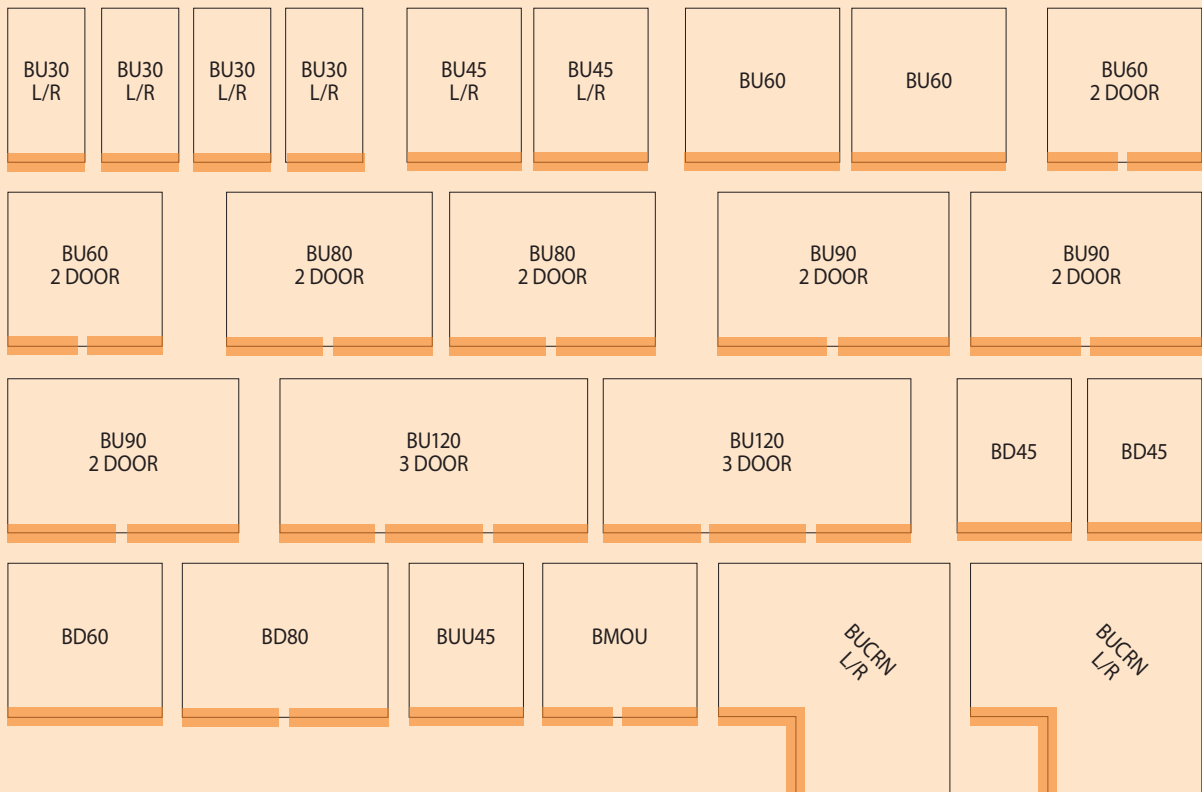

When you're done, you can use this Alpine Kitchen Guide to quote your new kitchen.

IMPORTANT INFORMATION – PLEASE READ: This publication is not intended to replace expert advice. All information and advice contained within this brochure is intended as a guide only. Alpine does not warranty the accuracy or completeness of the information contained in this brochure. Alpine advises you to consult a suitably qualified person when undertaking installations of this kind.

You should also take note that there may be laws and regulations with which you must comply with when undertaking work described in this brochure. You should consult with your local council and/or any other regulatory body, to obtain any necessary permissions or permits required. This should be done prior to any work commencing.
